## PATIENT PRICE LIST

01/11/2024

**Please note:**

The prices indicated within this document are for guidance only. Prior to making any decision regarding treatment we advise that you have confirmed all costs with us and request further clarification if anything is unclear.

[We reserve the right to amend prices at any time.](#)

---

Initial Consultations and Pre-Treatment Assessment		
Initial consultation	A 60-minute medical consultation with Mr Dimitrios Psaroudakis, UK-trained & certified Consultant Gynaecologist and Fertility Specialist	£ 250
Follow up Consultation	A 45–60-minute medical consultation (if required) with Mr Dimitrios Psaroudakis	£ 250
Ultrasound scan	Ultrasound scan with 3D sweep	£ 225
Early pregnancy scan	Clinical pregnancy scan - Early viability scan 6-8 weeks	£ 225
Semen Analysis	Semen analysis with antisperm antibodies identification (MAR test)	£ 165
HyCoSy	Ultrasound technique to evaluate the tubal patency	£ 400
Saline Infusion Hysterosonogram (3D scan)	Ultrasound technique with saline contrast to evaluate the uterine cavity and lining	£ 400
Anti-Mullerian Hormone (AMH)	Ovarian reserve blood test	£ 100
Virology Screening Blood Tests (per partner)	<p>HIV, Hepatitis B surface antigen (HBsAg), Hepatitis B core antibody (Anti-HBc), Hepatitis C [HFEA Required]*,</p> <p>Every patient undergoing IVF, ICSI, egg freezing, or IUI treatments require these blood tests.</p> <p>These tests must be with within 3 months of a first treatment cycle (i.e. egg collection or IUI procedure) and then repeated every 2 years for subsequent cycles.</p> <p><i>*Screening tests may be performed with your GP; however, it is a regulatory requirement that pathology tests must be carried out by a laboratory with ISO 15189 accreditation. We cannot accept any infectious disease screening results that do not include the laboratory's details and confirmation that the laboratory is ISO 15189 accredited.</i></p>	£ 190
Rubella	Female patients must be tested to ensure immunity to rubella before treatment. If you are pregnant and catch rubella, it can cause serious damage to the unborn child.	£ 45
Chlamydia and Gonorrhoea (per partner)	All patients are tested for Chlamydia and Gonorrhoea to allow our doctor to treat any infection, prevent further spread and assess any damage which may have been caused to their fertility.	£ 65
Cycle monitoring		
Ovulation induction/Cycle Monitoring	Monitoring ultrasound scan (unlimited number per cycle), clinical planning & support	£ 500
Oestradiol (E2)	If required	£ 45
Luteinizing Hormone (LH)	If required	£ 45
Progesterone (P4)	If required	£ 45

## Intrauterine Insemination (IUI)

<b>Intrauterine Insemination (IUI) 1 cycle</b>	<b>Included:</b> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the treatment cycle</li> <li>Monitoring ultrasound scans</li> <li>Sperm Preparation</li> <li>Insemination</li> <li>Patient/Clinical Intelligence</li> </ul>	<b>£ 1 300</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£50 - £1000)</li> <li>Pregnancy scan or follow-up consultation</li> </ul>	<b>Charged separately</b>
<b>Intrauterine Insemination (IUI) with Donor Sperm</b>	<b>Included:</b> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the treatment cycle</li> <li>Monitoring ultrasound scans</li> <li>Donor sperm Preparation</li> <li>Insemination</li> <li>Patient/Clinical Intelligence</li> <li>HFEA Fee - £ 40</li> </ul>	<b>£ 1 300</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£50 - £500)</li> <li>Pregnancy scan or follow-up consultation</li> <li>Donor sperm sample costs (Sperm Bank fee)</li> </ul>	<b>Charged separately</b>

### Cancellation and Refund policy for the IUI cycles:

Patients are eligible for a refund of £1010, if the treatment cycle is abandoned during stimulation and before the insemination procedure is scheduled.

Patients will be charged for blood tests that have been performed and any medications that have been dispensed up to the date of cycle cancellation, as these are not refundable under any circumstances.

<b>Intrauterine Insemination (IUI) 3 cycle</b>	<p>Multicycle IUI treatments contain and exclude the same items from individual treatment cycle option.</p> <p>Multicycle Intrauterine Insemination (IUI) treatment starts from the beginning of the 1st cycle of the package. A previous IUI cycle attempt cannot be joined as a part of the package.</p> <p>IUI multicycle packages must be paid in full before the first cycle is started and completed within 9 months.</p>	<b>£ 3 000</b>
--	---	----------------

### Cancellation and Refund policy for the IUI multicycle package:

If a cycle is abandoned prior to insemination (for a clinical reason), this will be omitted from the 3-cycle package, however the patient will be charged for any blood tests and medications dispensed relating to the cancelled cycle.

There is no refund offered if a livebirth occurs after any of the 3 cycles or if the 3 cycles are completed without live birth.

If any of the 3 cycles are not completed within a 9-month period, no refund is available.

If you wish to convert to IVF/ICSI or stop treatment, prior to the completion of the 3 cycles, you will be charged for the IUI cycles undertaken at the standard price list and the remainder of the multicycle fees paid can be deducted from the IVF/ICSI cycle or refunded.

## IVF & ICSI Treatment Cycle

IVF/ICSI Cycle	<b>Included:</b> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the IVF treatment cycle</li> <li>Nurse consultation</li> <li>Monitoring ultrasound scans</li> <li>Patient/Clinician intelligence</li> <li>Egg collection procedure &amp; sedation</li> <li>Sperm preparation</li> <li>Fertilization and embryo culture</li> <li>Extended blastocyst culture (Day 5)*</li> <li>Embryoscope**</li> <li>AI Embryo Assessment and Patient Embryo Viewer</li> <li>Fresh embryo transfer</li> <li>HFEA Fee</li> <li>Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy</li> </ul>	<b>£ 5 160</b>
	ICSI with AI sperm selection***	<b>£ 750</b>
	GM-CSF and Zymot (mandatory)	<b>£ 250</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£500 - £2500)</li> <li>Embryo freezing of extra embryos (£400- up to 4 straws) and storage</li> </ul>	<b>Charged separately</b>

\* We routinely plan to culture all embryos to day 5. This fee is charged for each IVF cycle but will be refunded if culture beyond day 3 does not take place (see cancellation policy).

\*\* Incubation in the non-interrupted time-lapse imaging incubator (Embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged for each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place (see cancellation policy).

\*\*\* We charge all patients the ICSI cost in advance to have the possibility to do a rescue ICSI, but in case the procedure does not take place, these costs are refunded (see cancellation policy).

### Cancellation and Refund policy for the IVF/ICSI cycles:

If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for the refund of £4 870 + £250 (GM-CSF and Zymot)

If the cycle is abandoned because of premature ovulation on the day of egg collection or if no eggs are collected or no mature eggs are found, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, AI embryo assessment, patient embryo viewer, fresh embryo transfer, HFEA Fee - £700 + £750 (ICSI if it was prepaid).

If there is a failure at the fertilisation/cleavage stages, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, fresh embryo transfer, HFEA Fee - £450.

If ICSI is not performed, then the patient will be eligible for a £750 refund.

Any blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

## IVF & ICSI Treatment Cycle | Day 3 Transfer

IVF/ICSI Cycle	<b>Included:</b> <ul style="list-style-type: none"> <li>• Clinical planning &amp; support during the IVF treatment cycle</li> <li>• Nurse consultation</li> <li>• Monitoring ultrasound scans</li> <li>• Patient/Clinician intelligence</li> <li>• Egg collection procedure &amp; sedation</li> <li>• Sperm preparation</li> <li>• Fertilization and embryo culture</li> <li>• Embryoscope**</li> <li>• AI Embryo Assessment and Patient Embryo Viewer</li> <li>• Fresh embryo transfer on Day 3</li> <li>• HFEA Fee</li> <li>• Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy</li> </ul>	<b>£ 4910</b>
	ICSI with AI sperm selection***	<b>£ 750</b>
	GM-CSF and Zymot (mandatory)	<b>£ 250</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>• Pre-treatment screening blood tests</li> <li>• Monitoring blood tests</li> <li>• Medications (£500 - £2500)</li> <li>• Embryo freezing of extra embryos (£400- up to 4 straws) and storage</li> </ul>	<b>Charged separately</b>

\*\* Incubation in the non-interrupted time-lapse imaging incubator (Embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged for each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place (see cancellation policy).

\*\*\* We charge all patients the ICSI cost in advance to have the possibility to do a rescue ICSI, but in case the procedure does not take place, these costs are refunded (see cancellation policy).

### Cancellation and Refund policy for the IVF/ICSI cycles:

If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for the refund of £4 620 + £250 (GM-CSF and Zymot)

If the cycle is abandoned because of premature ovulation on the day of egg collection or if no eggs are collected or no mature eggs are found, then the patient will be eligible for a partial refund, which includes fees for the AI embryo assessment, patient embryo viewer, fresh embryo transfer, HFEA Fee - £450 + £750 (ICSI if it was prepaid).

If there is a failure at the fertilisation/cleavage stages, then the patient will be eligible for a partial refund, which includes fees for the fresh embryo transfer, HFEA Fee - £200.

If ICSI is not performed, then the patient will be eligible for a £750 refund.

Any blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

## Elective Frozen IVF/ICSI Cycle

<p><b>Elective Frozen IVF/ICSI Cycle</b> (e.g. risk of OHSS, need for PGT-a)</p>	<p><b>Included:</b></p> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the IVF treatment cycle</li> <li>Nurse consultation</li> <li>Monitoring ultrasound scans</li> <li>Patient/Clinician intelligence</li> <li>Egg collection procedure &amp; sedation</li> <li>Sperm preparation</li> <li>Fertilization and embryo culture</li> <li>Extended blastocyst culture (Day 5)*</li> <li>Embryoscope**</li> <li>AI Embryo Assessment and Patient embryo viewer</li> <li>Embryo freezing (up to 4 straws)</li> </ul>	<p><b>£ 5 160</b></p>
	<p>ICSI with AI sperm selection***</p>	<p><b>£ 750</b></p>
	<p>GM-CSF and Zymot (mandatory)</p>	<p><b>£ 250</b></p>
	<p><b>Not Included:</b></p> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£500 - £2500)</li> <li>Embryo storage fee</li> </ul>	<p><b>Charged separately</b></p>

\* We routinely plan to culture all embryos to day 5. This fee is charged for each IVF cycle but will be refunded if culture beyond day 3 does not take place (see cancellation policy).

\*\* Incubation in the non-interrupted time-lapse imaging incubator (embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged for each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place (see cancellation policy).

\*\*\* We charge all patients the ICSI cost in advance to have the possibility to do rescue ICSI, but in case the procedure does not take place, these costs are refunded to the patient (see cancellation policy).

### Cancellation and Refund policy for the Elective Frozen IVF/ICSI cycle:

If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for the refund of £ 4 870 +£250 (GM-CSF and Zymot)

If the cycle is abandoned because of premature ovulation on the day of egg collection or if no eggs are collected or no mature eggs are found, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, AI embryo assessment, patient embryo viewer, embryo freezing - £800 + £750 (ICSI if it was prepaid).

If there is a failure on the fertilisation/cleavage stages, then the patient will be eligible for a partial refund, which includes fees for the extended blastocyst culture, embryo freezing - £550.

If ICSI is not performed, then the patient will be eligible for a £750 refund.

Any blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

## Egg + Embryo batching Cycle

<b>Egg + Embryo batching (Low ORT): 3 Cycle Package</b>	<b>Included:</b> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the 3 IVF treatment cycles</li> <li>Nurse consultation</li> <li>Monitoring ultrasound scans (in 3 cycles)</li> <li>Patient/Clinician intelligence</li> <li>Egg collection procedure &amp; sedation (in 3 cycles)</li> <li>Egg freezing (in 2 cycles)</li> <li>Egg thawing (in the end of the 3<sup>rd</sup> cycle)</li> <li>Sperm preparation</li> <li>ICSI with AI sperm selection</li> <li>Fertilization and embryo culture</li> <li>Extended blastocyst culture (Day 5)*</li> <li>Embryoscope**</li> <li>AI Embryo Assessment and Patient embryo viewer</li> <li>Fresh embryo transfer</li> <li>HFEA Fee</li> <li>Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy</li> </ul>	<p><b>£ 13 120</b></p>
	GM-CSF and Zymot (mandatory)	<p><b>£ 250</b></p>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£500 - £2500 per cycle)</li> <li>Embryo freezing of extra embryos (£400- up to 4 straws) and storage</li> </ul>	<p><b>Charged separately</b></p>

The patient would be expected to pay in full for the 3 cycles package in advance, before the first cycle is started. The cycles need to be completed within a 12-month period.

This package includes egg freezing for 2 cycles + egg thaw + fertilisation + embryo transfer at the 3rd cycle.

\* We routinely plan to culture all embryos to day 5. This fee is charged each IVF cycle but will be refunded if culture beyond day 3 does not take place.

\*\*Incubation in the non-interrupted time-lapse imaging incubator (embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place.

### Cancellation and Refund policy for the Egg + Embryo batching 3 Cycle Package:

If a cycle is abandoned prior to the egg collection procedure, this will be omitted from the package fee, however the patient will be charged for any diagnostic procedures, blood tests and medications dispensed relating to the cancelled cycle.

There is no refund offered in the event of no eggs being collected, fertilisation failure or nothing suitable for freezing. The Egg + Embryo batching 3 Cycle Package is complete when all egg collections have been performed.

There is no refund offered if The Egg + Embryo batching 3 Cycle Package is completed without a live birth.

If any of the 3 cycles are not completed within a 12-month period, no refund is available.

**DUOSTIM**

**DUOSTIM (2 ovarian stimulation in 1 cycle)**

**Included:**

- Clinical planning & support during the treatment cycle
- Nurse consultation
- Monitoring ultrasound scans
- Patient/Clinician intelligence
- Egg collection procedure & sedation (2 times in 1 cycle)
- Egg freezing (after 1<sup>st</sup> egg retrieval)
- Egg thawing (after 2<sup>nd</sup> egg retrieval)
- Sperm preparation
- ICSI with AI sperm selection
- Fertilization and embryo culture
- Extended blastocyst culture (Day 5)\*
- Embryoscope\*\*
- AI Embryo Assessment and Patient embryo viewer
- Embryo freezing (up to 4 straws)

**£ 8 440**

GM-CSF and Zymot (mandatory)

**£ 250**

**Not Included:**

- Pre-treatment screening blood tests
- Monitoring blood tests
- Medications (£500 - £2500 per 1 stimulation)
- Embryo storage fee

**Charged separately**

Ovarian stimulation is carried out 2 times, during the follicular and luteal phases of the same cycle.

This package includes 2 egg collections + egg freezing after the 1<sup>st</sup> egg retrieval + egg thawing after the 2<sup>nd</sup> egg retrieval + fertilisation of thawed and fresh eggs + embryo freezing.

\* We routinely plan to culture all embryos to day 5. This fee is charged each IVF cycle but will be refunded if culture beyond day 3 does not take place.

\*\*Incubation in the non-interrupted time-lapse imaging incubator (embryoscope) is our mandatory approach for monitoring embryo development. This fee is charged each IVF cycle but will be refunded if fertilisation and embryo cultivation does not take place.

**Cancellation policy and Refund policy for the DUOSTIM Package:**

The refund amount depends on the stage at which treatment is interrupted and is discussed with each patient individually.

There is no refund offered in the event of no eggs being collected, fertilisation failure or nothing suitable for freezing.

There is no refund offered if DUOSTIM program is completed without live birth.

Any diagnostic procedures, scans, blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

## Egg Freezing cycles

<b>Egg Freezing Cycle</b>	<b>Included:</b> <ul style="list-style-type: none"> <li>• Clinical planning &amp; support during the treatment cycle</li> <li>• Nurse consultation</li> <li>• Monitoring ultrasound scans</li> <li>• Patient/Clinician intelligence</li> <li>• Egg collection procedure &amp; sedation</li> <li>• Egg freezing (up to 4 straws)</li> <li>• AI Egg Assessment and Patient egg viewer</li> </ul>	<b>£ 3 340</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>• Pre-treatment screening blood tests</li> <li>• Monitoring blood tests</li> <li>• Medications (£500 - £2500 per cycle)</li> <li>• Cryo storage fee</li> </ul>	<b>Charged separately</b>

### Cancellation and Refund policy for the Egg Freezing cycles:

If the cycle is abandoned before the trigger injection has been made, the patient will be eligible for the refund of £3 050.

If the cycle is abandoned because of premature ovulation on the day of egg collection or if no eggs are collected or no mature eggs are found for freezing, then the patient will be eligible for a partial refund, which includes AI egg assessment and patient egg viewer, egg freezing - £550

Any diagnostic procedures, blood tests performed, and medications dispensed during the treatment cycle are not refundable under any circumstances.

<b>Multicycle Egg Freezing Packages (egg batching)</b>	<b>2 Cycles Package</b>	<b>£ 5 540</b>
	<b>3 Cycles Package</b>	<b>£ 7 840</b>
	<p>Multicycle Egg Freezing Packages contain and exclude the same items as the individual treatment cycle option.</p> <p>Multicycle Egg Freezing starts from the beginning of the 1st cycle of the package. A previous Egg freezing cycle attempt cannot be joined as a part of the package.</p> <p>Multicycle Egg Freezing Packages must be paid in full before the first cycle is started and completed within 6-months period for the 2 cycles package and within 9-month period for the 3 cycles package.</p>	

### Cancellation and Refund policy for the Multicycle Egg Freezing package:

If the cycle is abandoned prior to the egg collection procedure, this will be omitted from the multicycle package, however, the patient will be charged for any diagnostic procedures, blood tests and medications dispensed relating to the cancelled cycle.

There is no refund offered in the event of no eggs being collected or the eggs collected are not suitable for freezing. The multicycle Egg Freezing package is complete when all egg collections have been performed.

If any of the 2 or 3 cycles are not completed within the time limits indicated above, no refund is available.

## Frozen Embryo Transfer

<b>Frozen Embryo Transfer</b>	<b>Included:</b> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the frozen embryo transfer treatment cycle</li> <li>Nurse consultation</li> <li>Monitoring ultrasound scans</li> <li>Patient/Clinician intelligence</li> <li>Embryoscope</li> <li>Frozen/thawed embryo transfer</li> <li>HFEA Fee</li> <li>Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy</li> </ul>	<b>£ 2 000</b>
	GM-CSF (mandatory)	<b>£ 150</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£50 - £1500 per cycle)</li> </ul>	<b>Charged separately</b>

### Cancellation and Refund policy for the Frozen Embryo Transfer:

If there is a failure on the thaw stage and there are no further embryos available for transfer, patient will be eligible for HFEA fee refund - £100

## Egg Thaw and Embryo Transfer

<b>Egg Thaw and Embryo Transfer</b>	<b>Included:</b> <ul style="list-style-type: none"> <li>Clinical planning &amp; support during the treatment cycle</li> <li>Nurse consultation</li> <li>Monitoring ultrasound scans</li> <li>Patient/Clinician intelligence</li> <li>Egg Thawing</li> <li>Sperm preparation</li> <li>ICSI with AI sperm selection</li> <li>Fertilization and embryo culture</li> <li>Extended blastocyst culture (Day 5)</li> <li>Embryoscope</li> <li>AI Embryo Assessment and Patient embryo viewer</li> <li>Fresh embryo transfer</li> <li>HFEA Fee</li> <li>Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy</li> </ul>	<b>£ 4000</b>
	GM-CSF and Zymot (mandatory)	<b>£ 250</b>
	<b>Not Included:</b> <ul style="list-style-type: none"> <li>Pre-treatment screening blood tests</li> <li>Monitoring blood tests</li> <li>Medications (£50 - £1500 per cycle)</li> <li>Embryo freezing of extra embryos (£400- up to 4 straws) and storage</li> </ul>	<b>Charged separately</b>

### Cancellation and Refund policy for the Egg Thaw and Embryo Transfer package:

If there is a failure on the egg thaw stage, patient will be eligible for a partial refund, which includes fees for ICSI with AI sperm selection, extended blastocyst culture, AI Embryo Assessment and Patient embryo viewer, Fresh embryo transfer, HFEA - £1 350.

If there is a failure on fertilisation/cleavage stages, patient will be eligible for the partial refund, which includes fees for the extended blastocyst culture - £ 250.

## Egg Donation cycles

<b>Egg Donation Cycles</b>	<b>Donation Program with 6 Frozen Donor Eggs</b>	<b>£ 8 610</b>
	<b>Donation Program with 8 Frozen Donor Eggs</b>	<b>£ 9 510</b>
	<b>Donation Program with 12 Frozen Donor Eggs</b>	<b>£ 11 310</b>
	Each Egg Donation Program includes: <ul style="list-style-type: none"> <li>• Frozen Donor Eggs</li> <li>• Clinical planning &amp; support during the treatment cycle</li> <li>• Donation matching</li> <li>• Nurse consultation</li> <li>• Monitoring ultrasound scans for recipient</li> <li>• Patient/Clinician intelligence</li> <li>• Donor eggs thawing</li> <li>• Sperm preparation</li> <li>• ICSI with AI sperm selection</li> <li>• Fertilization and embryo culture</li> <li>• Extended blastocyst culture (Day 5)</li> <li>• Embryoscope</li> <li>• AI Embryo Assessment and Patient embryo viewer</li> <li>• Fresh embryo transfer</li> <li>• HFEA Fee</li> <li>• Pregnancy scan, or a follow up consultation for cycles which do not result in a clinical pregnancy</li> </ul>	
	GM-CSF and Zymot (mandatory)	<b>£ 250</b>
	Not Included: <ul style="list-style-type: none"> <li>• Pre-treatment screening blood tests of egg recipient</li> <li>• Monitoring blood tests for egg recipient</li> <li>• Medications for egg recipient</li> <li>• Embryo freezing of extra embryos (£400- up to 4 straws) and storage</li> </ul>	<b>Charged separately</b>

Egg Donation Program costs include costs for frozen donor eggs of Caucasian phenotype only. Alternative phenotypes including Asian / African donors have different costs POA.

All eggs have been screened for infectious diseases and quarantined for a 3-month period in accordance with HFEA guidance. ECS report available on selected donors.

We suggest using 12- donor-eggs package because the CLBR increase progressively according to the number of oocytes consumed: 5 oocytes - 6.1%, **12 oocytes - 53.4%**.

### Cancellation and Refund policy for Egg Donation Cycle package:

If there is a failure on fertilisation/cleavage stages, patient will be eligible for the partial refund, which includes fees for the extended blastocyst culture - £ 250.

If there is a failure with Donor oocytes thawing, patient will be eligible for the refund from the Donor Egg Bank

Additional services		
Embryo/Egg Freezing	Up to 4 straws	£ 400
Extra Embryo/Egg Freezing	Per each additional straw	£ 100
Embryo/Egg/Sperm Cryo storage	1 month	£ 40
Embryo/Egg/Sperm Cryo storage	1 year	£ 360
Embryo/Egg Thaw	If batching of embryos, this fee is applicable for the thawing of embryos in a subsequent IVF cycle	£ 750
ERA test (Endometrial Receptivity Array Test)	Includes a scan but excludes medication & blood tests	£ 1 300
Repeat ERA	If required	£ 1 200
EMMA (Endometrial Microbiome Metagenomic Analysis) / ALICE (Analysis of Infectious Chronic Endometritis)	EMMA analyses the endometrial microbiome to identify an abnormal uterine environment. Includes a scan but excludes medication & blood tests if EMMA tests positive a second sample is required.  ALICE is a test that detects pathogenic bacteria causing chronic endometritis.	£ 1 300
Repeat EMMA/ALICE	If required	£ 300
EndomeTRIO (ERA & EMMA/ALICE)		£1 600
PGT-A up to 5 Embryos	Genetic testing to detect abnormalities with the number of chromosomes	£ 2 750
PGT-A per embryo	Genetic testing to detect abnormalities with the number of chromosomes	£ 650
Endometrial scratch		£ 200
Sedation		£ 400
Hysteroscopy	Hysteroscopy (incl. sedation, excl. histology)	£ 2000
Sperm freeze		£ 200
Sperm DNA Fragmentation Analysis		£ 500
Semen Culture		£ 75
